

CDD.H Series Honeycycle Compact Dehumidifying Dryers

Machine specifications are about the same as the Honeycycle Dehumidifiers but more with process heater fitted as standard. This system includes an insulated drying hopper and a portable floor stand also an insulated material suction box in which the optional integral powered hopper loader draws dry air from the system to act as venturi source to form a semi-closed-loop loading configuration (see illustration), or to adapt with an optional separate powered hopper loader to form a closed-loop loading configuration (see illustration). Material drying capacity of 100 and 1500 kg/hr depending on models hence suitable for drying large quantities of hygroscopic materials. Dew-point of the dried air is up to -50°C.

The Dehumidifying Principle

Drying Capacities Kg/hour

Material	Drying Temp.(°C)	Drying ⁽¹⁾ Time (hr)	Moisture Content(%)	Specific Heat	Drying Capacity ⁽²⁾ / CDD.H model								
					100	150	200	300	400	500	700	1000	1500

(1) Base on relative humidity 65% with ambient temperature of 20°C, moisture content after drying can be 0.005% or less.

(2) Capacities are based on 60hz operations.

Specifications

CDD.H model	100	150	200	300	400	500	700	1000	1500

* Those models use high-efficiency turbo blower.

** Base on the condition of “before” air temperature at 100°C and “after” air temperature at 20°C, and using 10°C chilled water.
